

Crop Hail Adjuster

Municipal Hail Insurance is currently hiring Crop Hail Adjusters!

Ready to turn summer storms into meaningful work? Join an established leader in crop hail insurance and support producers when it matters most.

As a crop hail adjuster, you will be required to travel the province and assess crops for hail damage. This is an on-demand role driven by the volume and timing of hail storms. Typically, the majority of our claims are adjusted in the months of July and August.

We have an excellent training program and strong support team in the field. Each storm will be led by a Storm Supervisor who will manage the storm and will assign claims to you for adjustment.

Our field work is completely digital, supported by an in-house tablet system that handles calculations, documentation, and proof-of-loss generation — giving adjusters everything they need in the field.

Successful candidates must be physically fit, own and operate a vehicle suitable for field use and have the ability to work independently in a fast-paced, on-demand environment. Additionally, candidates should be prepared to work away from home for up to 10-12 days at a time.

Qualifications:

- An Agriculture/Agronomy background would be an asset
- Strong analysis and communication skills
- Client-first mindset
- Ability to work independently
- Attention to detail
- Ability to accurately document claims
- Willingness to travel and work for up to 10-12 days
- Exceptional written and verbal communication skills across various digital platforms such as text, email, and cellular phone
- Ability to handle the challenges of unpredictable weather and uneven farm terrain
- Desire to succeed

MHI provides a competitive compensation package tailored to your needs, we offer a salary plus expenses with benefits or contract employment.

Join a passionate team committed to making a real difference for our clients and communities.
